

Higher-Order Components Test

Test 1: Card with Children

Welcome Card

This content is passed as children to the Card component.

Multiple child elements are supported.

Test 2: JSX Element as Prop

Star Button

Heart Button

Test 3: Nested Components

Outer Card

Inner Card

Deeply nested content works too!

Page Header

Page with Header and Footer Props

This demonstrates passing JSX elements as header and footer props to a layout component.

The header and footer are rendered in their designated slots.
